# Geo Drain Cells

Avail from us a wide assortment of Geo Drain Cells, which are highly efficient drainage cells. These cells are especially designed to be used in planter boxes, roof gardens and retaining walls. Architects and developers prefer our Geo Drain Cells due to their excellent design flexibility. Our range finds its wide usage in landscaping, building and construction industries. These cells can be installed easily by interlocking them horizontally. We offer our range of Geo Drain Cells in heights of 20mm and 30mm. These Cells act like a protection layer over waterproofing membranes and create a thermal insulation barrier as well. Due to the open surface design of these cells and high internal void volume, high water volumes can be rapidly captures and transported.

## Typical Details

## Application Areas :

- ▲ Terrace or Roof Gardens
- ▲ Tunnels & Landfills
- ▲ Bridge abutments
- ▲ Capillary irrigation
- ▲ Landscape decks
- ▲ Paved areas & Roadways
- ▲ Sports fields & Golfcourse
- ▲ Pond filtration
- ▲ Agri - Horti & Floriculture applications etc.

## Drainage Cells Specification

INTERLOCKING	Geodrain Cell 20mm	Geo Drain Cell 30mm	Flexo Drain Cell 13mm
Dimensions (L x W)	500 mm X 250 mm	500 mm X 250 mm	500 mm X 250 mm
Height	20mm	30mm	20mm
Weight	1.880kg / Sqm	3.120kg / Sqm	1.120 kg / Sqm
Material	100% Recycled PolyPropylene		
Compressive Strength	>100 tn/m <sup>2</sup>	>120 tn/m <sup>2</sup>	>80 tn/m <sup>2</sup>
Service Temperature	-10°C to 120°C		
Biological/Chemical Resistance	Unaffected by Moulds, Alkalis, Soil borne chemicals, Alkalis and Blunders.		
Surface Void Area	>67%		
Internal Void Area	>95%

# PVC Grass Pavers

Grass Paver provides the strength of pavement with the natural beauty of grass while simultaneously eliminating soil compaction, reducing reflective heat and allowing for all weather accessibility at a very cost effective price. It has been successfully applied in function such as fire lanes platform, parking lots, pedestrian street, etc. so that the car can park on the lawn directly without hurting the grass growing on it. After the vehicles leave, you can have a piece of natural green lawn again. Grass paver is a product designed for outdoor landscape and developed for urban ecology. Its unique design protects the grass roots, so that grass can grow well even under heavy load of automobiles.

## Car Parking Lots

## Truck Lanes

## Golf Course Tracks

## Fire Engine Access Lanes

## Typical Details

### For Soil Base

Note: Compacting to be done at each stage with vibrators.

### For RCC Base

Note: Compacting to be done at each stage with vibrators.

## Grass paver Specification

Dimensions (L x W)	500 mm X 250 mm
Height	40 mm
Weight	4Kg/Sqm
Material	100% recycled Polypropylene
Compressive Strength	150 tn/m <sup>2</sup>
Service Temperature	-30 c to 125 c
Biological/Chemical Resistance	Unaffected by moulds and algae, soil borne chemicals, bacteria and blue-green, Oils & light acid, or alkaline solutions
